CHAPTER ONE:INTRODUCTION

Public participation is a constitutional requirement specifically, Article 1 that states that sovereign power belongs to the people and Article 10 (2) (a) and the Fourth Schedule Part 2 (14) of the Constitution of Kenya and is stipulated as a function of the County Government. Sections 87 to 92 and 115 of the County Governments Act, 2012 outline the principles of public participation and the imperative for facilitating public participation in the work of the County government. Public participation is a structured way of consulting with persons, groups and entities before decisions are made. It is designed to give a voice to the voiceless and cements the concept of agency to the County Government, that is, the County government becomes an agent of the people. Public participation is not meant to convey decisions already made, but to generate and confirm decisions. It is not a political process but a non-partisan process that involves the agent going to ‘take instruction and direction’ from the people.

The County Government of Mandera will seek to utilize the various levels of participation, that is, the government is committed to the promotion of consultation, placation, and partnership and citizen control models of participation. The County government will promote and ensure people-centered and people-driven development as anticipated by the constitution. The government will continuously strive to create an enabling environment for citizens to be involved in and participate in the development of policies from the initial stages. As a result the government adopts the following forms of public participation:

- Informing the public by providing information to help them understand the issues, options and solutions;
- Consulting with the public to obtain their feedback on alternatives or decisions;
- Involving the public to ensure their concerns are considered throughout the decision making process particularly in the development of decision criteria and options;
- Collaborating with the public to develop decision criteria and alternatives and identify the preferred solutions; and
- Empowering the public by placing final decision making authority in their hands.

1.1 County Integrated Development Plan (2018-22)

This County Integrated Development Plan is the first publication produced by the county government of Mandera and its stakeholders. It is the new medium term county development blueprint and is motivated by a collective aspiration for a better society by the end of the Plan period. The Plan has been informed by the Kenya Vision 2030 that aims to transform Kenya into „a newly industrialising, middle income country providing a high quality of life to all its citizens in a clean and secure environment“. Simultaneously, the plan aspires to accelerate the realization of the MDGs for county residents by 2022. Its implementation will be through annual rolling work plans starting from the period 2018 to 2022. All the priorities and plans to be implemented must therefore have the CIDP as its reference point.

1.2 The Legal Framework for Public Participation in Kenya

1.2.1 The Constitution of Kenya, 2010

1. Article 1(2): All sovereign power belongs to the people of Kenya. The people may exercise their sovereignty directly or through their elected representatives.

2. Article 10 (2) a, b and c: The national values and principles of governance include; democracy and participation of the people; inclusiveness; good governance, integrity, transparency and accountability.

3. Article 27: The Constitution guarantees equality and non-discrimination. Hence, public participation should ensure equality and non-discrimination.

4. Article 33: Public participation should respect the freedom of expression of all participants.

5. Article 35: The Constitution guarantees the right to access information by citizens

6. Article 61: Gives the public, individually or as a group, a say in matters of land including acquisition, management, transfer, disposal, or ownership of private, public and/or community land.

7. Article 69(1) (d): The State shall encourage public participation in the management, protection, and conservation of the environment.

8. Article 118: (1) Parliament shall— **(a)** conduct its business in an open manner, and its sittings and those of its committees shall be open to the public; and **(b)** facilitate public participation and involvement in the legislative and other business of Parliament and its committees.

9. Article 119(1): Every person has a right to petition Parliament to consider any matter within its authority, including enacting, amending, or repealing any legislation.

(2) Parliament may not exclude the public, or any media, from any sitting, unless in exceptional circumstances the relevant Speaker has determined that there are justifiable reasons for the exclusion.

10. Article 174(c): Objects of devolution are: to give powers of self-governance to the people and enhance their participation in the exercise of such powers in decision-making.

11. Article 174(d): Communities have the right to manage their own affairs and to further their development.

12. Article 184(1): National legislation shall provide for the governance and management of urban areas and cities and shall, in particular— **(c)** provide for participation by residents in the governance of urban areas and cities.

13. Article 196(1): A county assembly shall— **(a)** conduct its business in an open manner, and hold its sittings and those of its committees, in public; and **(b)** facilitate public participation and involvement in the legislative and other business of the assembly and its committees.

(2) A county assembly may not exclude the public, or any media, from any sitting, unless in exceptional circumstances the speaker has determined that there are justifiable reasons for doing so.

14. Article 201 (a): there shall be openness and accountability, including public participation in financial matters

15. Article 232(1) (d): The values and principles of public service include the involvement of the people in the process of policy making and **(f)** transparency and provision to the public of timely and accurate information.

16. Fourth Schedule Part 2(14): The functions and powers of the county are to coordinate and ensure the participation of communities in governance. Counties are also to assist communities to develop the administrative capacity to enhance their exercise of power and participation in governance at the local level.

1.2.2 The Public Finance Management Act

The Act contains various provisions on public participation in Kenya that relate to Chapter 13 of the Constitution on public finance.

1. Section 125(2): The County Executive Committee member for finance shall ensure that there is public participation in the budget process (provided for under Section 125:1).

2. Section 175(9): The accounting officer of an urban area or city shall ensure public participation in preparing the strategic plan (175:1) and the annual budget estimates (175:5) as

outlined in the second schedule of the Urban Areas and Cities Act, 2011. For that purpose, he or she may publish guidelines for public participation.

3. Section 207: County Governments are to establish structures, mechanisms, and guidelines for citizen participation.

1.2.3 The County Governments Act

The provisions on public participation in Kenya contained in this Act affect the county governments.

1. Section 113: Makes public participation in county planning processes compulsory.

2. Section 87: Stipulates the principles of public participation. They include timely access to information and reasonable access to planning and policy making process.

3. Section 88: Citizens have a right to petition the county government on any matter under the responsibility of the county government.

4. Section 90: A county government may conduct a local referendum on among other local issues— county laws and petitions, or planning and investment decisions affecting the county for which a petition has been raised and duly signed by at least twenty five percent of the registered voters where the referendum is to take place.

Section 91: The county government shall facilitate the establishment of modalities, and platforms for citizen participation e.g. town hall meetings, IT based technologies and establishment of citizen fora at county and decentralized units.

Sections 94, 95, 96: Counties are to establish mechanisms to facilitate public communication and access to information using media with the widest public outreach. Every county shall designate an office for ensuring access to information.

Sections 100 and 101: County governments should create an institutional framework for civic education.

1.3 Specific Objectives of County Integrated Development Plan Public Participation

The following specific objectives were to be achieved:

- a. To engage stakeholders on identification of new projects, ranking and prioritization and ensure community ownership to strengthen sustainability.
- b. To ensure openness and accountability in public finance management. This would be achieved through providing stakeholders/community feedbacks on county policies, projects and programmes implemented in the previous CIDP 2018-2022 and the new proposals for 2018-2022 County Integrated Development Plan.
- c. To ensure that the county public finance system promotes an equitable society and in particular expenditure that promotes the equitable development of the county, including by making special provision for the marginalized groups and areas. This would be achieved through harmonization and integration of results of the top down and bottom up planning approaches.

1.4 Rationale for Public Participation

Participatory Planning aims to:

Reduce social exclusion and poverty: the traditional planning and budgeting process can sometimes contribute to social exclusion and poverty due to elite capture, limiting resources available for service to the poor. By encouraging citizens' participation in planning decision making, participatory planning could be used to increase the allocation of resources to basic services in the poorest areas.

Increase efficiency in the long term budget allocation: County Integrated Development Plan is the most important document of the government's priorities.

Scarce public resources are often spent on the wrong goods or the wrong people. Public participation can improve efficiency in budget allocation by creating procedures and avenues that bring the demand side closer to medium term planning.

Improve accountability and management: government plans are often perceived as too complex and technical for citizens' understanding. The complexity of information can facilitate the concealing of elite capture, leakages and under-performance; or it can just be the result of weak management capacity. Participatory planning has been used to demystify the budget, and improve inter-departmental coordination, and financial management.

Increase trust between government and population: citizens often complain that government is not solving their problems and not using their taxes for their needs. Lack of public expenditure information leads to public discontent and inaccurate citizen perceptions of corruption. Participatory planning can strengthen trust in government substantially as it encourages citizens and government to discuss budget constraints. This process provides an opportunity for government and citizens to discuss trade – offs on the use of scarce public resources vis- a –vis urgent and strategic investments.

Strengthen democratic practices: democratic systems are not always perfect. While the budgeting process has an annual decision making cycle and a continuous execution process, governments are mainly held accountable for their decisions during election time .This time lag can create favourable conditions for elite capture, patronage and clientism. By strengthening the linkages between the whole budget process cycle and citizens’ participation, participatory budgeting can improve democratic practices.

CHAPTER TWO:SUBCOUNTY PRIORITIES

2.0 Public Participation Process and Methodology

The Mandera County Government public participation started from 15th January 2018 to 17th January 2018. County officers from planning, budget and the county line ministries conducted the public participation. Identification, mapping and mobilization of the crucial stakeholders through the elders, Members of the county assembly and Sub-county and Ward administrators.

2.1.1 Provision of Background Information on Draft CIDP

For citizens to participate meaningfully in the planning process, the County Planning unit widely circulated soft copies of draft CIDP on social media and also made it available at all ward offices across the county for citizens to prepare adequately.

2.1.3 Structure of Public participation

•**Registration and distribution of Information Education and Communication (IEC) material:** At this stage the county officials distributed attendance list, writing materials, draft ADP copies, and schedule.

•**Introductions:** The facilitators will break the ice by introducing the forum and participants and enabling participants to know the other while voicing their expectations.

•**Purpose of the forum:** The facilitators at this stage give a brief on the proposed legislation, policy and development plan up for discussion. They give participants background information on how the policy, development plan or legislation was formulated, the process leading to the forum and the expected outcome. The facilitator also indicates the kind of input they require from the forum and how it will be used. The facilitators and the participants jointly set the ground rules on running the forum.

•**Input from participants:** Depending on the number and diversity of people present at the forum, the facilitators may decide to have one forum or break it into many sessions. Fewer participants are ideal for one forum however where the numbers are high, the participants may break into smaller groups based either; on geographical regions, gender, age, interest group or any other objective criteria. For breakaway sessions, the participants will discuss the draft policy, legislation or development plan and present their views to the plenary at a different session. Breakaway sessions allow for objective interrogation of the drafts at hand. The facilitators should also indicate that input may be sent to the county via email, snail mail or through social media.

•**Presentations from breakaway sessions:** At this stage designated presenters from the various groups will make presentations to the plenary. The plenary will allow for questions, clarifications and further input.

•**Summary of the forum deliberations:** The facilitators will give a summary of the input given. They will then indicate the way forward and when a final report on how the views used by the county government would be released.

Feedback after public participation: After collecting views, the county government ought to inform the public on the outcome of public participation. This may be done through; a report or media briefing outlining the nature and number of views received; the number of views incorporated and ignored and why? Such reports would enhance public confidence that the county government listens to them and does not take them for granted.

2.1.4 The Selection of Participants

The County may rely on self-selection to identify members of the public to participate in the CIDP making process. However, they can put specific measures in place in order to ensure representation from various demographics and geographic units. Examples of these two categories are marginalized/minority groups and wards/sub-counties respectively. This process may therefore require a delegation system where selection is from the village level all the way up to sub-county levels.

2.1.5 Documentation of public participation process

- proposals, written memorandums and decisions made during public participation forums have been consolidated for easy documentation and use as reference. This has been published as an annexure to the Draft CIDP document and the final approved copy as well.
- CIDP Public participation forums and justifications given across the county have been recorded on both motion (Video) and still pictures by Governors press unit.

2.1.6 Moderation of Public Sessions

The Mandera County Executive ensured senior officers with knowledge of the budgetary and planning process moderated public planning sessions. They were able to facilitate discussions from both the public and the government in the process of participation. They ensured sure everyone participated, including members of marginalized and minority groups. Facilitators should also be able to moderate discussions around the issues that are most important to citizens.

CHAPTER THREE: CHALLENGES, RECOMMENDATIONS AND CONCLUSION

3.1 Introduction

This chapter provides a summary of challenges encountered during the public participation process, recommendations and conclusion.

3.1.1 Challenges

- ✓ Slow implementation of the development projects. This is slowly eroding public confidence on the county government.
- ✓ High illiteracy levels and community capacity gaps on participatory budgeting and planning and functions of each level of government.
- ✓ Heightened community expectations on the county government.
- ✓ Inadequate preparation and information gaps by county departments.
- ✓ Women and Youth participation in the public participation process is still low. Σ Public demand to be paid sitting/participation allowances.
- ✓ Inadequacy of the community members to prioritize their local projects.
- ✓ The uneven physical terrain of the county inhibits equitable and effective coverage of the targeted population.
- ✓ Political interference.
- ✓ Inadequate supervision, monitoring and evaluation of projects.

3.1.2 Recommendation

1. County departments to fast tract end term review for 2013-2017 development budget so that the projects implementation does not spill over to the next fiscal year.
2. Regular and targeted civic education needs to be conducted to sensitize community members on their roles and responsibilities under the devolved system of governance. Community fora could also be held on a quarterly basis in each ward to sensitize and get feedback from the community on the access, affordability and quality of services offered by the county government.
3. Follow up to ensure that the identified feasible field priorities and projects are integrated into both 2018/2019 ADP and budget. Priorities from public participation report for FY 2017/18 should also be considered. This is the responsibility of both the budget office and the county planning unit.

4. There is need to harmonize county government projects with those of other development players to avoid funds wastage and duplication or channelling of funds from different sources to one project without structured negotiation on project funding.
5. There is need for a strategy to ensure improved and effective youth participation in the future county budgets. The relevant line ministry and county planning unit to ensure this objective is realized.
6. The budget and planning office to keep up early timely plan preparation and deadlines to improve the budget process. Other institutions should also adhere to the budget and legal timelines.
7. There is need to further strengthen public participation, social budgeting and integration of the needs for special groups (women, youth, Persons with disabilities) and on the progressive realization of human rights within the county.
8. The projects should be equitably distributed within each ward to ensure there is complete ownership and even development in the ward.
9. Mass livestock hot iron branding to be conducted along conflict stricken areas.
10. Need to strengthen supervision, monitoring and evaluation of projects and programmes to ensure value for money of public funds is realized.

3.1.3 Conclusion

Effective public participation will only be realized when public concerns are taken into account during decision making processes. For it to succeed, it calls for concerted and collaborative efforts of the national government, county governments, political leaders, religious leaders, youth, women leaders and community leaders. . The public get intimately involved in the public participation process when the issue at stake relates directly to them. Furthermore when public participation occurs all the stakeholders easily cooperate to implement the decisions made. In summary, effective public participation helps in recognizing the right of communities to manage their own affairs and to further their development. This culminates in shared prosperity and socio-economic transformation.
